

The Perfect Parenting Solution

As time goes on we realize more and more how dangerous children's activities are and how everything in their lives has a huge impact on their personalities. Water can be contaminated, they could break a bone falling out of a tree, and if we can't see them for a few minutes they could be abducted or corrupted by a drug dealer. If they eat junk food once they will become obese or die of gluten allergies. Shooting Nerf guns or air soft guns will make them into sociopathic mass murderers. If we allow them to cross the street by themselves they will question our motives. Playing fantasy card games will make them Devil worshipers, taking them to Church will make them intolerant, teaching them morals will make them feel better than others. If they don't get a trophy for participating in anything they do they will feel less than perfect, and stop doing anything. If we let them eat anything but organic food they will contract a terrible disease and die. If we teach them to be generous they will never accomplish anything or learn to do things for themselves, if we teach them a good work ethic they'll feel like they're being pushed too hard and will be upset, angry, and resentful, which will lead to violence and crime. If we tell them to form their own ideas they may not choose the same ideas we hold, and this will cause more rebellion and eventually lead to total anarchy. They need to feel equal to others. Letting them express themselves when they are younger will lead to rebellion, hatred and viewpoints that are against the culture, which is extremely dangerous to everyone. For these and other reasons, we need to come up with a solution to keep our kids as normal and safe as possible.

This is why I propose that we take all kids from the age of 1 year through 10 years old and lock them in capsules until they are 18. Here they will be taught to think a certain way, listen to certain music, eat certain things, and to live a certain way. They will be made to look average, not good and not ugly, taught to talk a certain way, and will be made equally academic and athletically talented as everyone else. This will destroy any kind of differences they may have, make no one feel left out or

unloved. They will all be just as smart, just as athletic, just as good looking, ready, capable, wealthy, and gifted as everybody else. Everyone will finally be equal, no one different or unaccepted. There will be no need for government, everyone will respond the same way to every situation. It will create a perfect society full of perfect personalities. No fighting, no individualism, no crime, and no disputes over ideals. It is the perfect solution.

Tall people will have their growth surgically stunted and short people will be given measured amounts of HGH until everyone is exactly 5 feet tall. Anyone who manages to somehow be taller than this will have the correct amount of their legs cut off. All people must be the same or someone will feel inferior and we just can't handle that! Anyone born with any kind of advantage over anyone else will have the advantage stifled by some artificial means. Smart people will be hit in the head with heavy objects until their IQ is the same as everyone else's. Strong people will be weakened by means of chemicals, weights and surgery. Athletic people will have reflexes slowed and running speed reduced by any means see fit. Everyone needs to be exactly the same to avoid feelings of inferiority. People feeling too bad or too good about themselves has become an epidemic, and is the direct cause of all alcoholism, drug addiction, depression, arrogance, narcissism, suicide, anorexia, and obesity.

Anyone who questions the system or shows dangerous levels of individuality shall be quarantined and placed in solitary confinement until deemed fit to reenter society. We cannot have freethinkers in our perfect society. They sow the seeds of individuality, which creates differences which leads to the feelings of inferiority we are trying to avoid. Free thought is the cause of everything that is wrong with society. Freethinkers should be silenced, at any cost, including the death penalty as they are the key dangers to society. Creativity and free thought are as dangerous to society as a thousand atom bombs. Therefore we must make sure none of either are allowed to remain in the world.

Just think of the implications! No controversial TV shows, music, movies or books. Everyone doing the same things every day, hanging out with anyone just as easily as anyone else. There will be no more messy marriages or divorces, since everyone will be so similar there will be no reason for

marriage. Everyone will tolerate everyone else, no one will ever be given preference over someone else. Only when we are the same can we truly be equal and happy, so this truly is necessary to a society of equal persons.
